

nobi

The Nobi lights are here!

Today is the day we install the Nobi lights in your facility.

Here's what the light offers you and your residents:

- Immediate alerts to caregivers if a resident falls
- Automated lighting for comfort and safety
- 100% privacy: residents are in control
- Reduced room check-ins, allowing more time for personalised care

Concerning your privacy:

Nobi does **not** monitor caregivers' actions or behaviour

Please note: While the lighting is ready and operational, the fall detection needs a short learning period to optimise its settings.

This learning period and Nobi's smart features will only be activated once the resident has signed the Informed Consent Document.

Invitation: You will soon be invited to the fall detection training.

Don't miss this opportunity to get an in-depth understanding of our smart lights and how their advanced functions will significantly benefit you and your residents.

Questions or concerns?

We're here to assist you promptly:

- Visit our onboarding portal for all necessary documents and resources.
<https://clientportal.nobi.life>
- Access our virtual helpdesk for answers to common inquiries.
<https://support.nobi.cloud>
- E-mail us at support@nobi.life
