

The Nobi lights are here!

Today is the day we install the Nobi lights in your facility.

Here's what the light offers you and your residents:

- Immediate alerts to caregivers if a resident falls
- Automated lighting for comfort and safety
- 100% privacy: residents are in control
- Reduced room check-ins, allowing more time for personalized care

Concerning your privacy:

Nobi does **not** monitor caregivers' actions or behavior

Please note: While the lighting is ready and operational, the fall detection needs a short learning period to optimize its settings.

This learning period and Nobi's smart features will only be activated once the resident has signed the Informed Consent Document.

Questions or concerns?

We're here to assist you promptly:

- Visit our onboarding portal for all necessary documents and resources.
<https://clientportal.nobi.life>
- Access our virtual helpdesk for answers to common inquiries.
<https://support.nobi.cloud>
- Email us at support@nobi.life

Invitation: You will soon be invited to the fall detection training.

Don't miss this opportunity to get an in-depth understanding of our smart lights and how their advanced functions will significantly benefit you and your residents.
